

Supplier Quality Engineer wanted for green energy company in Jacksonville FL

This is a new position at a new SAFT facility being constructed in Jacksonville FL. We will be producing Li-Ion batteries for alternative energy storage, telecom, & hybrid military vehicles when our \$200MM facility is completed in June 2011. The position is responsible for:

- + Develop and manage the incoming inspection process and inspection room personnel.
- + Development of plans for in-process and final product acceptance.
- + Implement supplier quality program, including control plans for incoming material, supplier qualification, and material qualification.
- +Manages supplier CAPA & Nonconformance programs.

A successful candidate will enjoy *World Class* benefits such as:

- + Medical/Dental
- + Base to 67.5 + 7% 401k match
- + 3 weeks vacation first full year

Requirements

EDUCATION : B.S. Degree (Mechanical, Electrical or Manufacturing Engineering Degree preferred)

EXPERIENCE: A minimum of 7 years of Supplier Quality engineering experience required. APQP, PPAP, & continuous improvement methodology desired. Certifications as Lead auditor and CQE desired.

SPECIFIC KNOWLEDGE: ISO 9001 and AS9100 Quality System Requirements plus advanced risk management techniques such as FMEA, APQP, & PPAP.

To Apply
